

Sara Bassem

Amman, Jordan, +962 7X XXX XXXX, sara.email@email.com

Full Stack Developer

Professional Summary

Results-driven Full Stack Developer with 3+ years of experience building, deploying, and maintaining scalable web applications using React.js, Node.js (Express), and AWS cloud infrastructure. Strong background in designing RESTful APIs, managing CI/CD pipelines with GitLab, and deploying production-ready applications using Elastic Beanstalk and CloudFront. Experienced in Agile environments with a strong focus on performance, security, and reliability.

Technical Skills

Frontend Development

- **React.js**
- **HTML5, CSS3, JavaScript (ES6+)**
- **Responsive & high-performance UI development**

Backend Development

- **Node.js (Express.js)**
- **RESTful API design & integration**
- **Authentication & authorization**

AWS Cloud & DevOps

- **Elastic Beanstalk (application deployment & scaling)**
- **CloudFront (CDN & caching)**
- **EC2, Elastic Load Balancer (ELB)**
- **S3 (static hosting & storage)**
- **RDS (PostgreSQL, MySQL)**

- **Route 53 (DNS & routing)**
- **AWS Lambda & API Gateway (basic to intermediate)**
- **CloudWatch & SNS (monitoring & alerts)**

CI/CD & Automation

- **GitLab CI/CD pipelines**
- **Automated testing, build & deployment workflows**
- **Git & GitLab version control**

Security & Best Practices

- **AWS IAM, VPC & security groups**
 - **Encryption & access control**
 - **Performance & cost optimization**
-

Professional Experience

Full Stack Developer

ZX Company – Remote / Jordan

2023 – 2026

- **Developed responsive web applications using React.js for frontend and Node.js (Express) for backend**
- **Designed and implemented RESTful APIs ensuring seamless frontend-backend communication**
- **Deployed and managed applications on AWS Elastic Beanstalk, ensuring scalability and reliability**
- **Configured CloudFront for global content delivery and performance optimization**
- **Managed AWS services including EC2, S3, RDS, Route 53, and ELB**
- **Built and maintained GitLab CI/CD pipelines for automated testing and deployment**

- Implemented AWS security best practices including IAM roles, encryption, and access control
 - Set up monitoring and logging using CloudWatch and alerts via SNS
 - Collaborated with designers, product managers, and developers in an Agile/Scrum environment
 - Participated in code reviews, sprint planning, and technical documentation
-

Projects

Full Stack Web Application (AWS Hosted)

- Built a full-stack web application using React.js and Node.js
- Deployed the application using AWS Elastic Beanstalk with CI/CD via GitLab
- Integrated CloudFront and S3 for optimized content delivery
- Used RDS (PostgreSQL/MySQL) for database management
- Implemented secure authentication and role-based access control

(GitHub repositories available upon request)

Education

Bachelor's Degree in Computer Science / Software Engineering
The University of Jordan - 2023

Additional Information

- Experience working in remote, contract-based roles
- Familiar with Docker and basic Kubernetes concepts
- Knowledge of Infrastructure as Code (Terraform / CloudFormation – basic)
- Strong problem-solving and communication skills
- Available for immediate start
