SKILLS

Deep knowledge of networking fundamentals; CCNA and security technologies.

Scripting and Automation using Python.

Managing operating systems; Windows and Linux.

Designing and managing databases using SQL.

COURSES

• Secure DNS Using Blockchain Technology

Graduation Project, this project has a primary focus on integrating BC technology with decentralized DNS systems to address critical concerns and enhance the security, resilience, and transparency of the DNS infrastructure. The aim of the project is to design and implement a dependable and trustworthy DNS system by leveraging the decentralized and immutable characteristics of BC.

• The Full Data Scientist Track- SHAI For AI, 2024

100 Training Hours

Data Analysis and Machine Learning
Coding with Python
Neural Network Training

- Network Security Associate NSEI, 2023
- Network Fundamentals- Edraak, 2023

EDUCATION HISTORY

Bachelor of Network Security Engineering

AI-Balqa' Applied University| 2024

- Faculty of Engineering Technology
- Amman. Jordan
