JoSequal Company (Overtime)

Android Developer

Jan 2024 – Mar 2024

- Worked on Android Kotlin development.
- Integrated APIs in projects.
- Applying the MVVM
- Applied Data Binding concepts and principles effectively.
- Gained a good experience in GitHub.

Projects

- **Weeli (Flutter):** A mobile application for electric vehicles that displays the nearest charging station on the map. Users can also add home charging stations and make payments through the app.
- **Smart Mosque (Flutter):** A mobile application for automating mosque operations. The app can control mosque doors, fans, air conditioners, azan speakers, and lights both inside and outside the mosque. It also allows for the electronic management of the donation box, which can be opened through the app.

Education

2018 – 2022

Software Engineering

The World Islamic Sciences and Education University
