OBJECTIVE

Full Stack Developer with a strong foundation in developing user-centric web applications, specializing in both front-end and back-end technologies. Proficient in HTML, CSS, JavaScript, Bootstrap, PHP, MySQL, Laravel, and API development, with a passion for writing clean, efficient code and delivering innovative solutions. Gained extensive hands-on experience through completing 3 projects at Orange Coding Academy. Additionally, developing a strong understanding of SEO best practices and their importance in optimizing web applications for better visibility and performance. Eager to apply my technical expertise to a dynamic and forward-thinking web development team.

PROJECTS

Portfolio Website ([GitHub Repo](#)) :

This was my first portfolio project, built from scratch using HTML, CSS, and JavaScript. It helped me master core web design principles while creating a responsive and interactive user experience.

Rave Movies ([GitHub Repo](#)) :

A movie website built using HTML, CSS, JavaScript, Bootstrap, and an external API to fetch movie data. It offers an intuitive UI and interactive movie browsing experience.

Rezotech E-Commerce Website ([GitHub Repo](#)) :

An e-commerce site for laptop components using HTML, CSS, Bootstrap, JavaScript, PHP (MVC), and MySQL. Features include user authentication, admin dashboard, and an AI chatbot integrated via Mastrel AI API for smart recommendations.

VictoryField ([GitHub Repo](#)) :

A stadium booking website built with HTML, CSS, JavaScript, PHP, Laravel, MySQL, and Bootstrap. It offers field reservations, sports rules, latest sports news, and an admin dashboard for efficient management.
